

Firestore Console Setup Guide

Project: dashmesh-mechanix-dev | Firestore Setup Instructions

1. Step-by-Step Database Setup in Firebase Console

1. Open your browser and navigate to the Firebase Console (console.firebase.google.com).
2. Select the project: 'dashmesh-mechanix-dev'.
3. On the left sidebar menu, click on 'Firestore Database'.
4. In the Data tab, click on the '+ Start Collection' link.
5. For the Collection ID, type 'home_data' (exactly as written, lowercase) and click Next.
6. For the Document ID, type 'dashboard' (exactly as written, lowercase).
7. Under the fields section, add the root-level fields, arrays, and map fields as described below.
8. Click 'Save' to commit the changes. The Flutter app will instantly load and display this data.

2. Fields to Add Inside the "/home_data/dashboard" Document

Field / Key Name	Type	Recommended Value	UI Element Affected
newSells	number (integer)	14	Dashboard Summary - New Sells Card
activeRentals	number (integer)	32	Dashboard Summary - Active Rentals Card
activeAmcs	number (integer)	128	Dashboard Summary - Active AMCs Card
resolutionRatePercent	number (integer)	94	Dashboard Summary - Resolution Rate Card
pendingComplaintsCount	number (integer)	6	Resolution Rate Card Subtitle Count
todaySellsSummary	number (integer)	4	Sales Summary Card - Today's Total
weekSellsSummary	number (integer)	14	Sales Summary Card - Weekly Total
projectedGrowth	string	" +12% vs LW"	Sales Summary Card - Growth indicator

3. Formatting Array (List) Fields

A. todaySchedules (Array of maps)

Create a field named 'todaySchedules', set type to 'array', and add maps with these keys:

			Key N
title	string	Job or checkup title (e.g. "Leakage Issue - Terminal 4")	
subtitle	string	Assigned team (e.g. "Assigned to: Senior Mech Team")	
time	string	Scheduled time (e.g. "09:30 AM")	
isUrgent	boolean	Set to true for Red/Urgent list; false for Green/Checks list	

B. pendingComplaints (Array of maps)

Create a field named 'pendingComplaints', set type to 'array', and add maps with these keys:

			Key N
customerName	string	Company/Customer name (e.g. "Apex Manufacturing")	

Firebase Console Setup Guide

Project: dashmesh-mechanix-dev | Firestore Setup Instructions

customerId	string	Unique customer ID (e.g. "MCP-001")
issueType	string	Summarized complaint (e.g. "Low Flow Rate")
status	string	Set to "urgent" (red), "high" (orange), or "normal" (green)

C. amcProgresses (Array of maps)

Create a field named 'amcProgresses', set type to 'array', and add maps with these keys:

			Key Name
companyName	string	Enterprise account name (e.g. "Industrial Hub Corp")	
progress	number (float)	Completion value between 0.0 and 1.0 (e.g. 0.85)	
statusText	string	Detailed status message (e.g. "2 mos for checkup")	
isUrgent	boolean	Set to true for orange warning badge; false for green badge
